

StrategicERP Modernized its ERP Infrastructure with AceCloud

Zero-downtime migration and cost-predictable cloud foundation for business-critical ERP hosting.

INDUSTRY
ERP Software (Real Estate, Construction & Infrastructure)

LOCATION
Mumbai, India

USE CASE
Enterprise Cloud Infrastructure for ERP & HRMS Hosting

Key Outcomes

~50%
Lowered infrastructure cost

2 Months
Dev to Production, currently live

150 TB
Object storage for ERP workloads

Overview

StrategicERP is an enterprise software company that:

- Develops industry-specific ERP solutions for real estate, construction, EPC, and property management sectors.
- Helps organizations digitize and automate end-to-end business operations.

The price-to-performance ratio is genuinely great. As an Indian company running workloads in India, AceCloud makes sense commercially and operationally.
– Nirmitt Desai, CTO, StrategicERP

Use Case

- Enterprise Cloud Infrastructure for ERP & HRMS Hosting
StrategicERP required a stable, cost-predictable cloud environment to host its business-critical ERP platform, migrating Dev, UAT, and Production workloads off other cloud vendor with zero disruption to operations.

Challenges

- Infrastructure Instability
Performance issues and infrastructural instability significantly affected StrategicERP’s business-critical ERP operations.
- Unpredictable Costs
Cloud bills grew unpredictably as usage scaled acrossE2E & OVH cloud+unplanned operational complexity on top of costs.

Solutions

AceCloud delivered a fully-managed cloud environment built for stability, cost predictability, and business-critical uptime.

- Large-Scale Compute Migration
32 compute instances (746 vCPUs / 2,850 GB RAM) supporting Dev, UAT, and Production environments end-to-end.
- Managed Database & Kubernetes Infrastructure
17 fully-managed PostgreSQL databases and a 2-node managed Kubernetes environment, removing day-to-day operational overhead.
- High-Capacity Object Storage
150 TB of object storage for application data and backups.
- Predictable, INR-Billed Pricing
~50% lower cost than their previous providers. INR billing that removed forex complexity.

Impact Highlights

~50% Lower Infrastructure Cost, With Zero Migration Downtime StrategicERP gained a stable cost-predictable cloud environment, helping the team plan quarters without surprises.
