

StrategicERP Modernized its ERP Infrastructure with AceCloud

Zero-downtime migration and cost-predictable cloud foundation for business-critical ERP hosting

Key Outcomes

~50%

Lowered infrastructure cost

Zero

Downtime during migration

2 Months

Dev to Production, currently live

150 TB

Object storage for ERP workloads

Customer Background

Industry: ERP Software (Real Estate, Construction & Infrastructure) | **Location:** Mumbai, India
| **Use Case:** Enterprise Cloud Infrastructure for ERP & HRMS Hosting

StrategicERP required a stable, cost-predictable cloud environment to host its business-critical ERP platform, migrating Dev, UAT, and Production workloads off other cloud vendor with zero disruption to operations.

Use Case

- **Industry-specific Industry Solutions**

Develops industry-specific ERP solutions for real estate, construction, EPC, and property management sectors.

- **Digitized Business Solutions**

Helps organizations digitize and automate end-to-end business operations.

Challenges

- 🚩 **Infrastructure Instability**

Performance issues and infrastructural instability significantly affected StrategicERP's business-critical ERP operations.

- 🚩 **Unpredictable Costs**

Cloud bills grew unpredictably as usage scaled across E2E & OVH cloud + unplanned operational complexity on top of costs.

The price-to-performance ratio is great. As an Indian company running workloads in India, AceCloud makes sense commercially & operationally.

–Nirmit Desai, CTO, StrategicERP

Solutions (After AceCloud)

AceCloud delivered a fully-managed cloud environment built for stability, cost predictability, and business-critical uptime.

- ✓ **Large-Scale Compute Migration**
32 compute instances (746 vCPUs / 2,850 GB RAM) supporting Dev, UAT, and Production environments end-to-end.
- ✓ **High-Capacity Object Storage**
150 TB of object storage for application data and backups.
- ✓ **Managed Database & Kubernetes Infra**
17 fully-managed PostgreSQL databases & 2-node managed Kubernetes environment, removing daily operational overhead.
- ✓ **Predictable, INR-Billed Pricing**
~50% lower cost than their previous providers. INR billing that removed forex complexity.

Impact Highlight

~50%

Lower Infrastructure Cost,
With Zero Migration Downtime

StrategicERP gained a stable cost-predictable cloud environment, helping the team plan quarters without surprises.

AceCloud is a cloud infrastructure provider under RTDS Group, delivering secure and scalable cloud solutions to global businesses. Backed by 600+ experts, 20,000+ customers and 10+ data centers, AceCloud helps organizations build reliable, compliant and performance-ready IT environments.

Trusted by 20,000+ Businesses
