

# Steps to Submit a Review on Peerspot

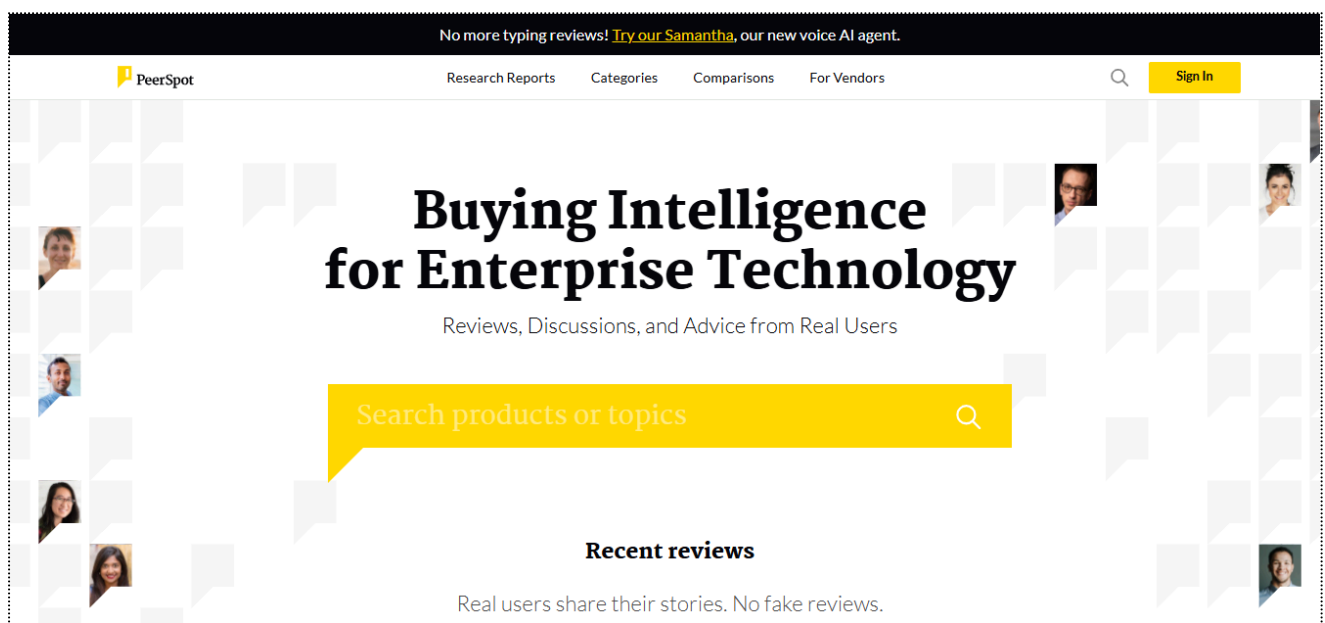

Please follow this simple step-by-step guide.

## 👉 Step 1: Open Peerspot

Visit the PeerSpot website:

<https://www.peerspot.com/>

Create your PeerSpot account using your **company email address** and enter your real professional information.

## 👉 Step 2: Verify Your Professional Profile

After creating your account, complete your professional verification.

**Connect and verify your LinkedIn profile if PeerSpot provides this option or asks you to do so.**

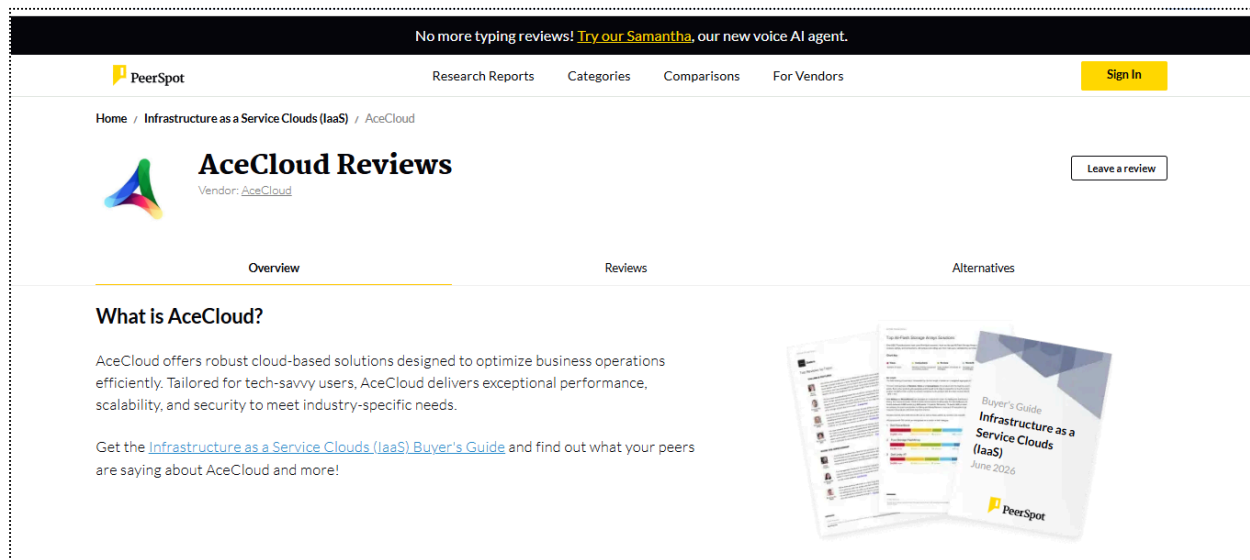

Make sure your LinkedIn profile reflects your real professional identity, including your:

- Full name
- Current company
- Current job title
- Professional experience

Use your **real and active LinkedIn profile**. Your PeerSpot account details should be consistent with your professional information.

### 👉 Step 3: Find AceCloud

Search for **AceCloud** or open the AceCloud profile.

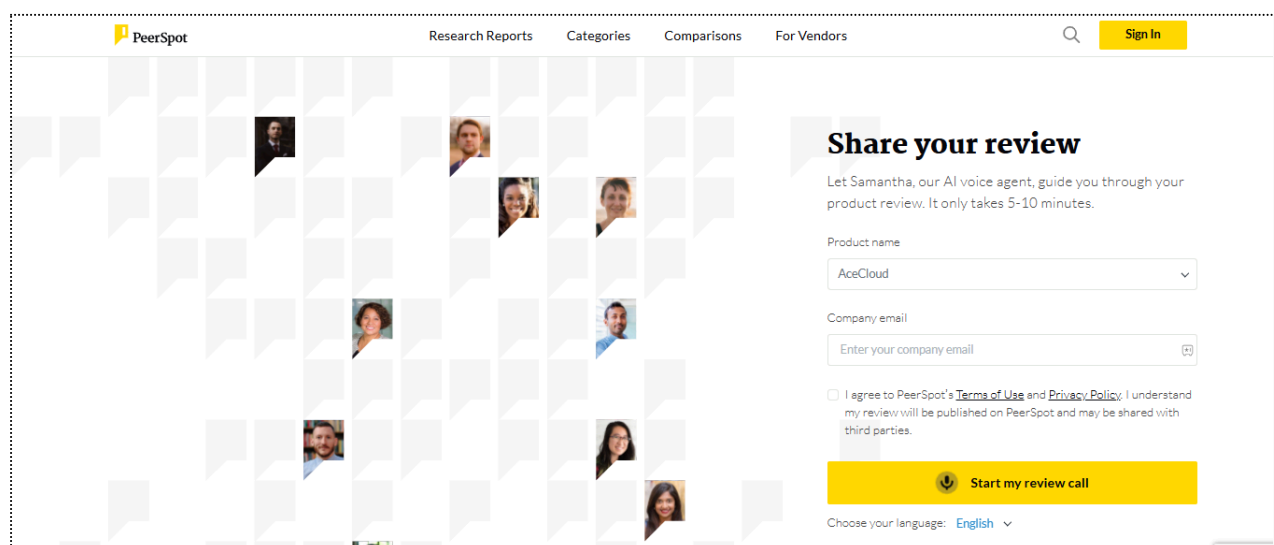

### 👉 Step 4: Start Your Review

Click **Leave a Review** to begin.

Please use your **company email address** where possible and provide your real professional details during the verification process.

PeerSpot may use an **AI voice agent** to collect your review. The agent will ask questions about your experience and may ask follow-up questions based on your answers.

## 👉 Step 5: Share Your Experience

- PeerSpot's AI voice agent will ask questions about your experience with AceCloud. Answer naturally in your own words. The agent may also ask follow-up questions based on your responses.
- Before starting, it helps to think about the following:
  - **1. About You**
    - **You may be asked:** What is your name, job title and company?
    - Be ready to briefly introduce yourself, your role and what you are responsible for.
  - **2. Experience with AceCloud**
    - **You may be asked:** How long have you been using AceCloud?
    - Mention how long you have used AceCloud and which product or service you use.
  - **3. Main Use Case**
    - **You may be asked:** How do you use AceCloud?
    - Briefly explain your workload or project. For example, website hosting, application hosting, GPU workloads, AI/ML, Kubernetes, storage or other cloud infrastructure.
  - **4. Specific Example**
    - **You may be asked:** Can you give an example of how AceCloud helps you?
    - Share one real example from your day-to-day experience. Explain what you needed to do and how AceCloud helped with that requirement.
  - **5. Most Valuable Features**
    - **You may be asked:** What are the best or most useful AceCloud features?
    - Mention the features you actually use and value. This could include performance, instance management, pricing, scalability, support, storage or ease of use.
  - **6. Customer Support**
    - **You may be asked:** What has your experience with AceCloud support been like?
    - If possible, mention a real situation where you contacted support, what assistance you received and what stood out about the experience.
  - **7. Impact on Your Organization**

- **You may be asked:** What improvements have you seen since using AceCloud?
- Talk about genuine outcomes such as easier infrastructure management, better performance, cost management, reliability, scalability or time saved. Use numbers only if you can verify them.
- **8. Areas for Improvement**
  - **You may be asked:** What could AceCloud do better?
  - Share genuine feedback. This could relate to the dashboard, documentation, features, billing, onboarding, support or anything else you believe could improve.
- **9. Overall Rating**
  - **You may be asked:** How would you rate AceCloud out of 10, and why?
  - Choose a rating based on your actual experience. Be prepared to explain what you like and what would need to improve for you to give a higher rating.
- **10. Deployment and Infrastructure**
  - **You may be asked:** How is AceCloud deployed in your organization?
  - Know whether your workload uses public cloud, private cloud, hybrid cloud or another setup. You may also be asked which cloud infrastructure/provider you use.
- **11. Advice for Other Users**
  - **You may be asked:** What advice would you give someone considering AceCloud?
  - Share practical advice based on what you have learned from using the service.
- **12. Relationship with AceCloud**
  - **You may be asked:** Are you only a customer, or do you have another business relationship with AceCloud?
  - Answer accurately if your organization is a customer, partner, reseller or has another relationship with AceCloud.
- **Note:** These are examples based on the PeerSpot review process. The exact questions and follow-up questions may vary depending on your answers.

## **Step 6: Review and Submit**

 Done! Review all the information you entered, confirm that the uploaded screenshot is correct, and click Submit. Then send the screenshot of your review with details to ([reviews@acecloud.ai](mailto:reviews@acecloud.ai))
