

Steps to follow

Please follow this step-by-step guide.

👉 Step 1: Record your AceCloud Experience

Record a **3- 5-minute video**.

You can briefly explain:

1. What challenge was your company facing?
2. Which AceCloud product or service did you use?
3. How did AceCloud help you?
4. What result or improvement did you experience?

Do

- Introduce AceCloud naturally within the first 30 seconds and explain what you used it for.
- Show the actual workload or environment on screen through the console, terminal, code, metrics, configuration, benchmark, or deployment.
- Show evidence behind important results, especially performance, cost, latency, throughput, or utilization claims.
- Include the relevant AceCloud link in the description and, where appropriate, in a pinned comment.

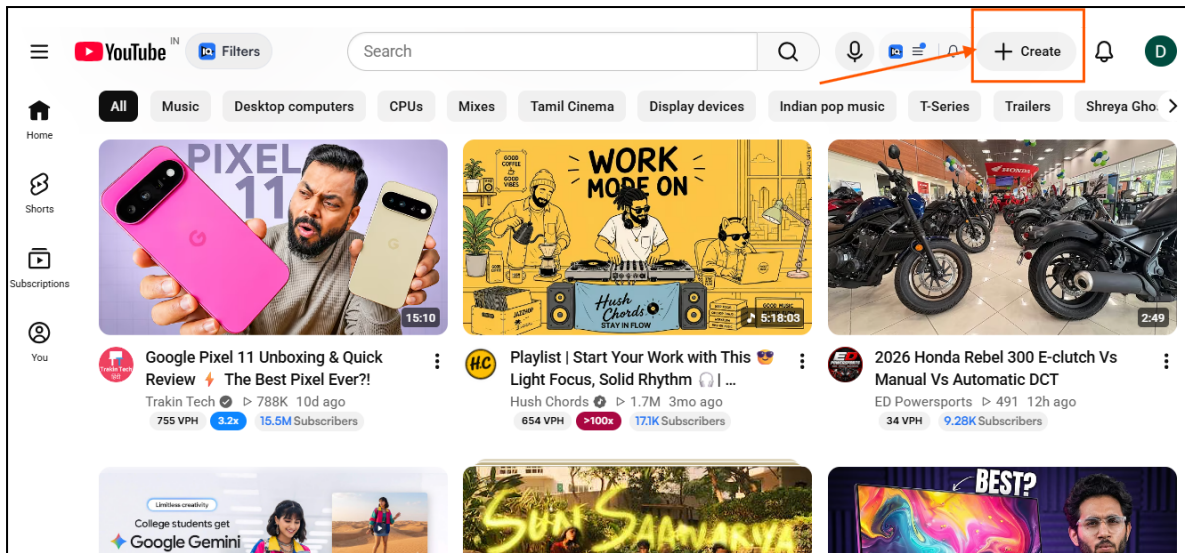

Don't

- Don't leave the AceCloud context until the end of the video.
- Don't rely only on talking-head commentary when demonstrating a technical workload.
- Don't pad the video with generic cloud or GPU explanations unrelated to the actual test.
- Don't show a benchmark result without explaining the setup or methodology.
- Don't turn the video into a scripted AceCloud advertisement. The workload and experience should remain the focus.

Example *"In this video, I'll show how I deployed my inference workload on AceCloud and compare the performance..."*

👉 Step 2: Open YouTube

Open the YouTube app and tap the + button at the bottom of the screen.

👉 Step 3: Select your video

Tap **Add from file explorer** and select the video you recorded.

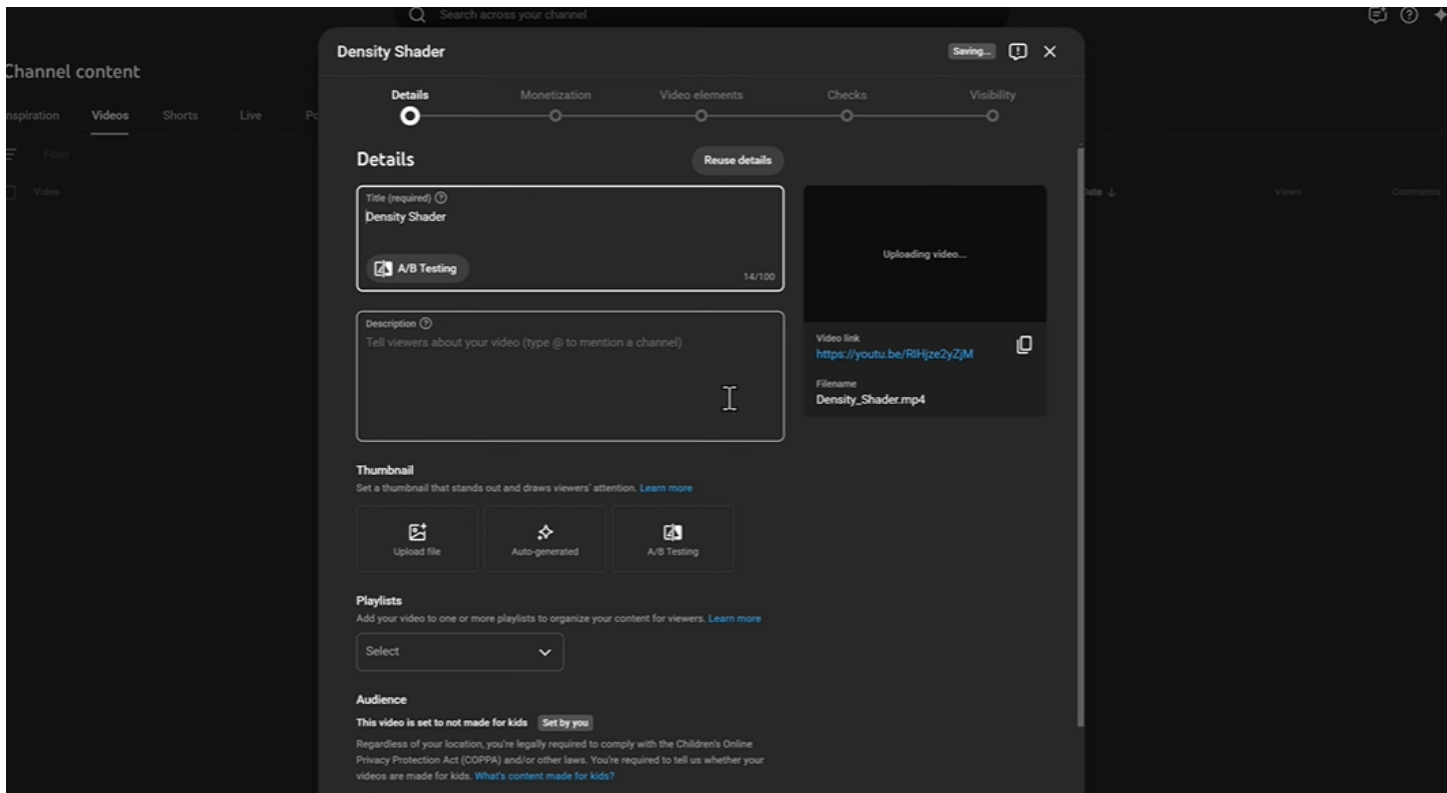

👉 Step 4: Add the video details

Title: Describe what you actually built, deployed, trained, or tested. Mention AceCloud naturally along with the relevant workload, model, GPU, or outcome.

Examples:

- How I Deployed Llama 3.3 70B on AceCloud GPUs
- Fine-Tuning Qwen2.5 on AceCloud H100 GPUs: Setup & Results
- How We Reduced AI Inference Latency Using AceCloud GPUs

Description: Briefly explain what you did, the AceCloud service you used, and the results you observed. Add the relevant AceCloud page so viewers can learn more.

👉 Step 4: Copy and submit the link

🎉 Done! Copy the YouTube video link and submit it with video details to us at (reviews@acecloud.ai).
