

Steps to Publish a Case Study on DEV Community

Please follow this simple step-by-step guide to create and publish your case study.

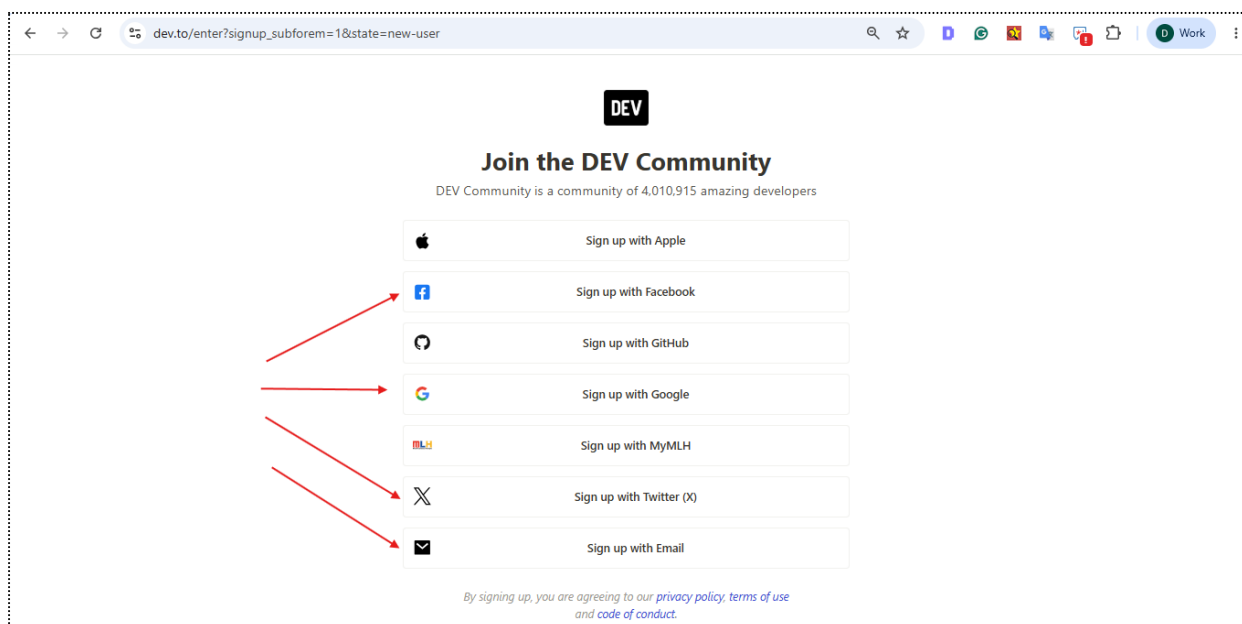

👉 Step 1: Open DEV Community

Open this website: (<https://dev.to/>)

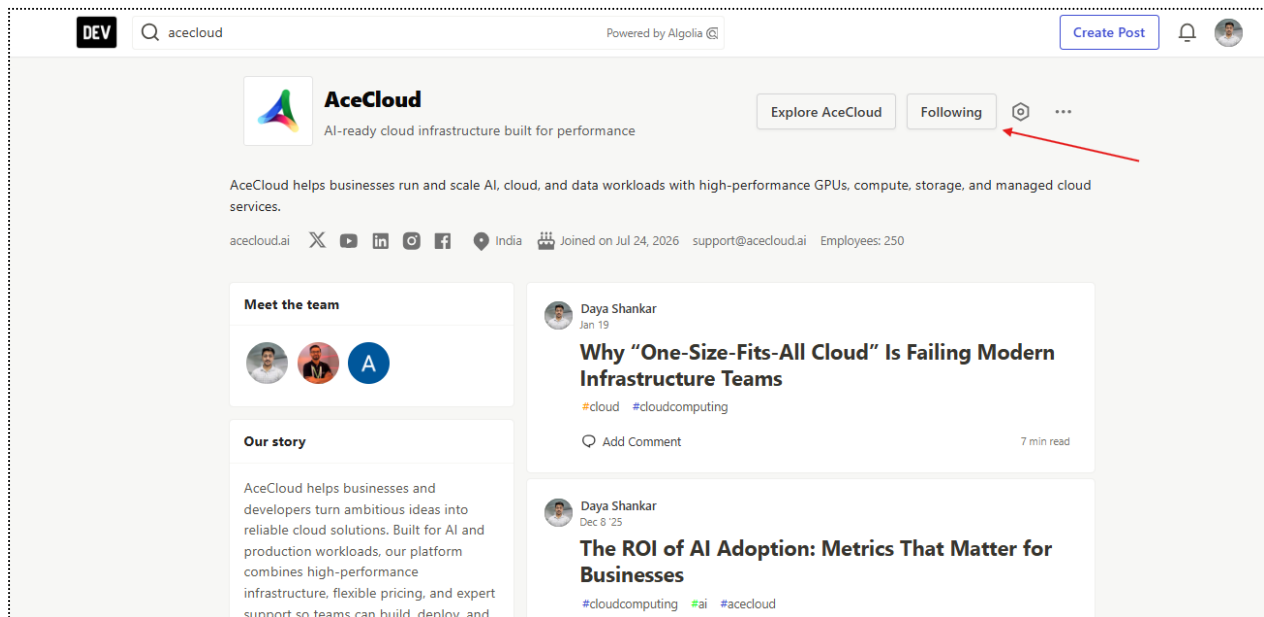

👉 Step 2: Create Your Account

Click Create account and sign up for a DEV Community account.

👉 Step 3: Follow AceCloud

Open the [AceCloud DEV profile](#) and click **Follow** to receive future updates.

👉 Step 4: Create and Publish Your Case Study

Click **Create Post**, add your case study content, upload the required image, review the details, and click **Publish**.

Do

- Lead with the technical problem, implementation, code, commands, configuration, or troubleshooting.
- Use up to four relevant DEV tags.
- Explain exactly where AceCloud was used in the implementation.
- Keep any AceCloud reference contextual to the technical experience.
- Follow DEV's current rules on promotional content and external links.

Don't

- Don't create a generic developer tutorial and add AceCloud as an afterthought.
- Don't make the article primarily about promoting AceCloud or obtaining a backlink.
- Don't add promotional CTAs, repeated AceCloud links, or forced anchor text.

- Don't publish if the contribution cannot stand on its own as useful developer content.

Writing a Great Post Title

- Think of your post title as a super short (but compelling!) description — like an overview of the actual post in one short sentence.
- Use keywords where appropriate to help ensure people can find your post by search.

👉 Step 5: Copy and Submit the Link

🎉 Done! Open your published case study, copy its URL, and submit it to us at (reviews@acecloud.ai).

A screenshot of a web browser displaying a Dev.to post. The browser's address bar is highlighted with a red box and contains the URL: dev.to/acecloud/the-roi-of-ai-adoption-metrics-that-matter-for-businesses-2p5h. The Dev.to interface shows the post by user 'Acecloud', posted on Dec 8, 2025. The post title is 'The ROI of AI Adoption: Metrics That Matter for'. The main image shows a robotic hand and a human hand reaching towards each other. On the right, the user's profile 'Acecloud' is visible, showing location 'India' and join date 'Jul 10, 2025'. Below the profile, there are links to other posts like 'Why "One-Size-Fits-All Cloud" Is Failing Modern Infrastructure Teams' and 'How to Evaluate IaaS Providers for Enterprise Workloads'. The bottom of the page features an 'Algolia' logo and a 'PROMOTED' badge.
